

The Basilisk Legend

It is a legendary story. It is said to be a formation of 'La Giant'. A snake called the Basilisk. All the eyes became 2 big yellow eyes, the skin became smooth and it had some yellow spikes. It grew longer and longer, till it reached 60 feet long.

Aoife

B is for Barn Owl

The Barn Owl nests high up in a dry dark place. In Europe Barn Owls are often found in the rooves of old barns. They sleep in the day and hunt at night. They have very sensitive hearing.

Olivia

Common Adder

A Common Adder lays about 8 or 12 eggs. There are 3 types of Common Adder. A female snake is slightly bigger than the male.

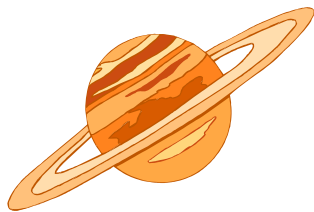

Kenwa

Saturn

Saturn has 18 moons. The largest moon is called Titan.

Eilish

My Weekend

I go to Mornington beach and we go for a walk. We went to the zoo. I played on the motor bikes and I played soccer.

Nicholas

Numbats

They only live in a very small place in Western Australia where there are gum trees. Numbats live by themselves. They sleep at night. They eat termites.

Teri

Ibis

Ibises have bare skin on their faces. Ibises have long bills to get food from water or in mud or cow pats.

The Glossy Ibis lives on lakes, rivers and marshy areas.

Taylor

Rainforests

There are only about 10 rainforests left in the world!!! The biggest rainforest in the world is the Amazon rainforest.
